## **Postdoctoral Position in Lymphatic Vasculature Research**

**POSTDOCTORAL POSITION is available to study different aspects of lymphatic vasculature development and metabolism in health and disease. Some of the projects include the characterization of the cellular and molecular mechanisms controlling the development of the lymphatic vasculature, endothelial cell plasticity and reprogramming, as well as different aspects related to lymphatic function and metabolism. Highly motivated individuals who recently obtained a PhD. or MD degree and have a strong background in mammalian vascular, molecular and developmental biology are encouraged to apply. Interested individuals should send their curriculum vitae, a brief description of their research interests, and the names of three references to:**

Guillermo Oliver, Ph.D

Thomas D Spies Professor of Lymphatic Metabolism

Director Center for Vascular and Developmental Biology
